

When It's Time For New Windows—Double The Performance With Our **DU2TECH**[®] ALUMINUM | VINYL HYBRID WINDOW

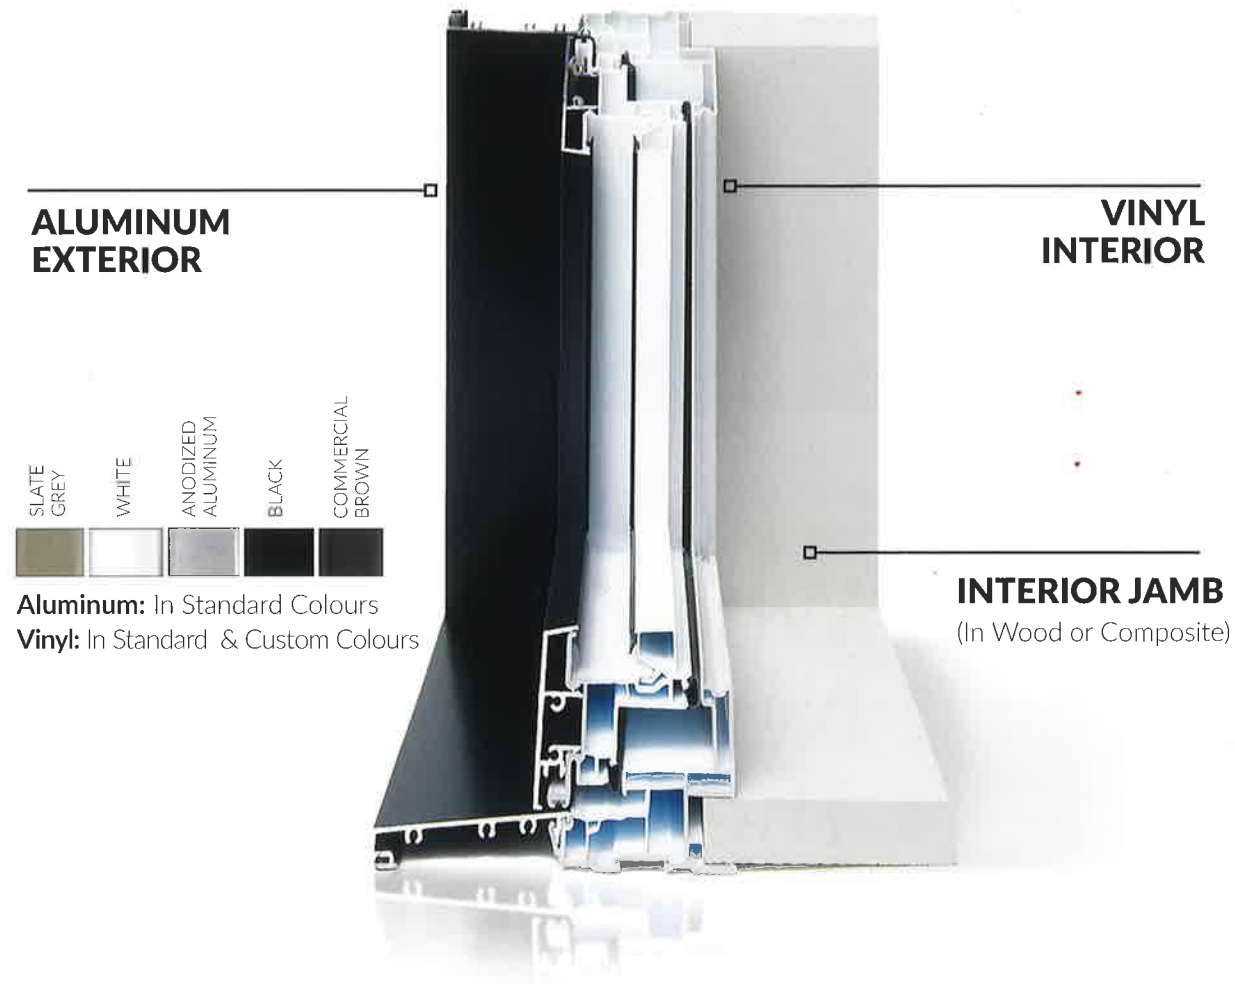

The Future Of Windows Is Hybrid.

Unitech has masterfully engineered a hybrid window that fuses the durability and modern appeal of aluminum with the superior energy performance of vinyl. Featuring a robust vinyl frame and an integrated aluminum extrusion for enhanced exterior resilience, Duotech delivers unmatched performance, stunning aesthetics, and long-lasting efficiency. Why settle when you can have the best of both worlds—without compromise?

The fusion of two great materials to make **DUOTECH**[®]

ALUMINUM | VINYL HYBRID WINDOW

Quality Features:

- ② Robust vinyl and aluminum construction, creates superior aesthetic/efficiency
- ② A rigid aluminum exterior enhances durability by combining the strength of aluminum with the reliability of PVC, while a proper thermal break minimizes heat and cold transfer for optimal insulation performance
- ② Modern streamlined hardware design
- ② High-performance dual and triple pane Low-E Argon glass for superior energy efficiency

MADE IN CANADA  **FOR OUR EXTREME WEATHER**
